

The Right Connection®

# API Single Sockets With Internal Grounding Device

FT300GW

FT301GW

## Application:

Used on fuel tankers to prevent overfilling

## Features:

- ground verification device wired into the socket
- color coded with industry standardized colors which allows for easy identification of socket type
- compatible with Scully and OPW Rack monitors that require a separate grounding device such as a ground bolt
- compatible with API RP1004 Optic and Thermistor configurations
- single sockets with "guaranteed for life" stainless steel wear rings are available, contact Dixon Bayco

## Materials:

- hardware and contact pins: stainless steel
- J slot wear rings: hard coated aluminum alloy
